

**Mediastream now the exclusive provider of Georgia news  
with the addition of WTOC – CBS Savannah on Channel 11**

Waycross, GA – **December 2, 2010** – After months of negotiations, Mediastream has struck a deal with WTOC - CBS Savannah. Mediastream is now the exclusive provider of Georgia news to Waycross and the surrounding areas! WTOC is back on its original location on Channel 11. Waycross as well as Ware and Brantley counties are designated by the Federal Communications Commission (FCC) as being part of the Jacksonville, FL Designated Market Area (DMA). As a result, only Jacksonville broadcasters are required by the FCC to negotiate with Mediastream to reach an agreement that allows Mediastream to carry the broadcast station on the cable system. Savannah broadcasters are not required to negotiate with Mediastream and are not required to provide a quality signal to Mediastream.

“Knowing how important Georgia news was to our customers, we have been working tirelessly for months now to reach an agreement to carry a Georgia-based broadcaster,” said Mike Jury, General Manager. “Our customers spoke and we listened. We’re very pleased to have WTOC from Savannah back on our channel lineup and to be the exclusive provider of Georgia news to this area.”

Other video providers in the market offer only the Jacksonville, Florida broadcasters to Ware and Brantley counties.

Mediastream serves approximately 10,000 cable, high speed internet and telephone customers in Waycross and Ware and Brantley counties. Mediastream now offers technical support services 24 / 7 with Techs2Go and home and commercial security systems with Security Systems *powered by* Mediastream.
